HOW TO VERIFY

- Open <https://www.thenetworkeruk.com> and click the padlock in the address bar.
- [thenetworkeruk.com](https://www.thenetworkeruk.com) and [the-networker.co.uk](https://www.thenetworkeruk.com) redirect to [www](https://www.thenetworkeruk.com) over HTTPS.

FOR IT TEAMS

- Allow HTTPS to www.thenetworkeruk.com (and optionally thenetworkeruk.com).
- No client-side certificate install needed — the server presents it during the HTTPS handshake.
